RE: Closeout Report for Building 334

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Closeout Report for Building 334, dated October 6, 2003. We appreciate being provided this Closeout Report for our information.

As we have previously requested, Closeout Reports should identify all removal activity and include a map of the facility identifying the structures involved, those removed, and the location of remaining infrastructure and its condition. Infrastructure includes all remaining materials and their location, and includes slabs, piers, footings, water pipes, gas lines, electrical conduits, drain lines, PWLs, sewer lines, etc. These maps are necessary for possible ER and/or future stewardship concerns. The discussion provided does not specifically address the infrastructure removed or remaining. It can only be assumed that the entire slab has been removed, and that in-ground utilities remain at the locations identified on the figure provided. It is also assumed, since not discussed, that this remaining infrastructure has been removed to below three feet of the final grade for this area, and that the sewer lines were not removed to the main line as indicated in the Facility Disposition RSOP, which is supposed to be followed for all facilities. As such, we would appreciate being provided a revised Closeout Report for B334 addressing these concerns.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
